Summary

Full-stack engineer specialized in frontend development with React and Next.js, and comfortable building REST APIs end-to-end with Node.js, Express, and SQL/NoSQL databases. Third-year CS student, ITI-certified in React Development. Experienced in component architecture, state management, and shipping production-ready applications.

Experience

Information Technology Institute (ITI) — Tanta Branch June 2026 – Present
React Development Intern iti.gov.eg

- Building React applications using Hooks, Context API, Redux Toolkit, and TanStack Query v5 for scalable state management and optimized data fetching.
- Developed a shared component library following Atomic Design, improving consistency and performance across multiple production projects.

Information Technology Institute (ITI) — Tanta Branch June 2025 – August 2025
React Development Intern iti.gov.eg

- Completed a 120-hour intensive React program covering Hooks, Redux Toolkit, and component-driven architecture; selected for the advanced project track.

Projects

E-Commerce REST API — Backend GitHub | 2025
Node.js · Express.js v5 · MongoDB · Mongoose · Stripe · JWT

- Built a production-ready REST API with JWT authentication and role-based access control (Admin/Manager/User).
- Implemented full CRUD for products, categories, brands, reviews, wishlist, and coupons, with image upload and resizing via Multer/Sharp.
- Developed the complete cart and order lifecycle, including Stripe checkout sessions, webhook-based order fulfillment, and security hardening (Helmet, rate limiting, XSS-Clean, Mongo-Sanitize).

V-Sync — Remote Interview Platform Live · GitHub | 2025
Next.js 14 · TypeScript · Convex · Stream SDK · Clerk · Monaco Editor

- Live code editing with Monaco Editor for real-time interviewer-candidate collaboration.
- HD video/audio via Stream Video SDK (WebRTC), supporting peer-to-peer and group sessions.
- Real-time data sync with Convex serverless; polished UI using Shadcn/Radix with dark mode.

UrMoviez — Cinema Discovery App Live · GitHub | 2025
React 19 · TanStack Query v5 · Framer Motion · Tailwind CSS v4 · TMDB API

- React 19 Suspense boundaries and deferred rendering for smooth UX across 10,000+ titles.
- Pagination, infinite scroll, and request deduplication via TanStack Query v5.
- Multi-parameter search and genre filtering using TMDB API with Framer Motion page transitions.

Personal Portfolio Live · GitHub | 2025
Next.js 14 · TypeScript · Framer Motion · Gemini AI · Umami Analytics

- Interactive animations (Framer Motion), Gemini-powered AI chat, self-hosted analytics, and SSR-optimized SEO.

LinkedIn Job Bot — Telegram Automator Channel · GitHub | 2024 – Present
Python · asyncio · httpx · SQLite · Telegram Bot API

- Vibe-coded with AI-assisted development to rapidly scrape 8+ job boards (LinkedIn, Wuzzuf, Bayt, GulfTalent, Remote, Himalayas) and post to a Telegram channel with 2,700+ subscribers – no browser automation.
- Concurrent scraping via asyncio.gather and SQLite deduplication, deployed 24/7 on Railway.

Education

Kafr Elsheikh University — B.Sc. Computer Science 2023 – Present (Expected June 2027)

- CGPA: 3.23 / 4.0 · GPA: 3.48 / 4.0

Skills

Languages	JavaScript (ES6+), TypeScript
React & Next.js	React 19 (Hooks, Concurrent Features, Suspense), Next.js 14 (App Router, SSR, SSG, ISR)
State & Data	Redux Toolkit, TanStack Query v5
UI & Styling	Tailwind CSS, Shadcn UI, Radix UI
Backend	Node.js, Express.js
Databases	MongoDB / Mongoose, PostgreSQL / SQL
Tools	Git/GitHub, Vite, Jest, React Testing Library, CI/CD

Languages

Arabic: Native | English: Professional Working Proficiency (B2+)
